

2-LINE DECONTAMINATION SYSTEM

System Overview

Two line decontamination system for effective decontamination of mass casualties with a compact footprint in an extremely portable and lightweight package.

Features

- Self-contained decontamination design insures state of the art performance, reliability, and speed of deployment
- Small footprint and space efficient design allows for easy storage and quick deployment in limited space situations
- Segregated lines enables patient privacy and smooth patient throughput
- Integral fabric booms and patented articulating frame reduces set-up time, maintains system integrity and increases functionality
- Four Internal ergonomic hand sprayers enable decontamination of non-ambulatory casualties with user directed spray
- Corrosion resistant anodized aluminum frame with chemical resistant fabric provides for long life and reliability
- Ultra-light conveyors with self-lubricating rollers simplifies non-ambulatory handling
- Matching transfer boards with alignment guides helps prevent further patient injury
- Exterior frame, supporting interior fabric, isolates contaminants and expedites post use cleanup

TSL offers a full range of equipment specifically designed to meet the requirements of our hospitals and first responders
