

INDIVIDUAL DECONTAMINATION SHELTER

Product Overview

Individual decontamination shelter for effective decontamination of a single ambulatory person. Shelter incorporates a tall profile to accommodate individuals fully outfitted in PPE.

Features

- Pre-fabricated decontamination design insures state of the art performance, reliability, and speed of deployment
- Integral cloth boom, pre-plumbed Quick Connect and patented articulating frame reduces set-up time, maintains system integrity, and increases functionality
- Ultra lightweight and small footprint allows for easy storage and quick deployment in limited space situations
- internal ergonomic hand sprayer enables full decontamination with user directed spray (ordered separately)
- Corrosion resistant series anodized aluminum frame with chemical resistant fabric provides for long life and reliability
- Interior canopy protects exterior frame from contaminants and expedites post-use clean up
- Camlok allows for easy plumbing connection with gloved hands

SD1-TTB02-GZ

Lightweight and economical decon
shelter set up by 1 person in 1 minute

Rapid Set-Up

- Utilizes patented articulating frame technology
- No inflation devices, poles or electricity required
- Can be quickly relocated after set-up

Standard Features

- Integrated fabric shower requires no installation
- Chemtex basin collects contaminated waste water
- White canopy top provides ambient, natural light
- All shelters include transport bag, ground cloth, windows, utility ports, repair and anchor kit

Shelter Specifications

- Canopy is UV stabilized, fire retardant, and chemical resistant
- Shelter constructed from non-corrosive material
