

LITTER CONVEYOR SYSTEM

Product Overview

Expandable litter conveyor system is lightweight and man-portable to ensure readiness to accept non-ambulatory patients into any decontamination system.

Features

- Litter conveyor utilizes TVI's patented articulating frame to provide rapid deployment of conveyor to transport non-ambulatory casualties
- Built in rollers have a weight capacity of 300 lbs. per roller provides a solid foundation for transport of patients
- Unit collapses quickly into a compact package for stowage or transport
- Transfer board utilizes guide system for ease of transport
- Self-lubricating, non-corrosive rollers provide years of reliable service
- Scissor-frame technology allows the conveyor to straddle any containment basin sidewall so that decontamination can take place and waste water captured
- Velcro "tongue" system to link sections together and customize the system to any length.
- Made from anodized aluminum and stainless steel hardware to withstand contaminants
- Open frame and slotted transfer board allow for easy flow through of contaminated waste water

Collapsible litter conveyor system is rapidly deployable for non-ambulatory patients will support 300lbs/ft

Catalogue Number	Weight	Packed Size	Deployed Size
LC1808-X 8' Conveyor	35	8"W x 29"L x 31"H	18"W x 8' L
LC1810-X 10' Conveyor	40	8"W x 36"L x 31"H	18"W x 10' L
LC1812-X 12' Conveyor	55	8"W x 41"L x 31"H	18"W x 12' L
LCA-B Conveyor Board	25	N/A	20"W x 8'L

Standard Features & Accessories

- Articulating frame
- Carry bag
- Nylon stabilizer straps
- 1 Stabilizer plate
- Velcro connection straps at each end
- Anodized frame is made from high grade structural aluminum
- Conveyor board made of rugged polyurethane
