

COLLAPSIBLE HAZMAT BASIN

Product Overview

Hazmat basins incorporate TVI's patented articulating frame technology combined with ChemTex rugged, chemical resistant fabric liner to provide quick containment of any hazardous spill.

Features

- Pre-fabricated design insures state of the art performance, reliability, and speed of deployment
- ChemTex Level A material contains nearly all contaminants for ample periods of time
- Drain port for subsequent disposal of fluid
- Anodized aluminum, polypropylene connectors and stainless bolts are non-corrosive to enhance durability
- Multiple uses include diesel containment from saddle tank leaks, hospital lab spills and containment for custom PVC showers and hand-held washdowns
- Flexibility of frame allows basin to compress for easy deployment under equipment leaks by one person
- Pre-attached ground cloth with replaceable inner liner inhibits abrasion of the ChemTex liner
- Lightweight and compact for easy transportation, it can be readily stored in almost all emergency vehicles
- Can also be used to contain waste water from field decontamination showers
- One piece design completely pre-assembled by the factory

Collapsible HazMat basin provides a quick & effective method for containment of emergency spills

Catalogue Number	Size	Height (in.)	Gallons
HB-36-36-1	36"x36"	12	30
HB-45-45-1	45"x45"	12	50
HB-55-55-1	55"x55"	12	70
HB-48-96-1	4'x8'	12	100
