

CASUALTY MANAGEMENT SHELTER

Product Overview

Casualty management shelters have reduced weight, good ventilation, and multiple entry/exit points.

Features

- Pre-fabricated Shelter design insures state of the art performance, reliability, and speed of deployment
- Exterior canopy configuration exposes frame to provide ample area from which to hang equipment
- Small cube expands to provide maximum footprint with minimal storage requirements
- Multiple uses include mass casualty care, command/control, equipment storage, triage and rehab
- Full length side windows provide ample ventilation and ambient light
- Side doors (not pictured) allow access to shelter while cutting down the wind profile during cold weather deployments
- 4 person deployment in under 5 minutes
- Corrosion resistant anodized aluminum frame with chemical resistant fabric provides for long life and reliability
- One piece design deploys with simple manual lifting, with no poles required

SCM-JZA09-2

Multi-use and economical shelter for the site casualty management set up by 4 people in under 5 minutes

Rapid Set-Up

- Utilizes TVI's patented articulating frame technology
- No inflation devices, poles or electricity required
- Can be quickly relocated after set-up

Standard Features

- Full length screen windows with cover flaps
- Two side entry doors for cold weather operations
- White canopy top provides ambient, natural light
- All shelters include transport bag, ground cloth, windows, utility ports, repair and anchor kits

Shelter Specifications

- Canopy is UV stabilized, fire retardant and chemical resistant
- Shelter is constructed from non-corrosive materials
