

# MULTI-PURPOSE SHELTER

## Product Overview

Multi-purpose shelters are the value point for study, all weather temporary shelters. They are built with exterior fabric only for weight and cost considerations, and have a compact footprint enabling them to be used in most locations.

## Features

- Pre-fabricated Shelter design insures state of the art performance, reliability, and speed of deployment
- Uses include command/control post, triage center, warming and rehabilitation area
- Side screen windows provide ventilation and ambient light
- Compact footprint and light weight insure easy two person deployment under any conditions
- Corrosion resistant anodized aluminum frame with chemical resistant fabric provides for long life and reliability
- Interior canopy includes white, opaque skylight that provides ambient lighting and protects exterior frame from contaminants and expedites post-use cleanup
- One piece design deploys with simple manual lifting, with no poles required
- Robust frame erects and operates even with damaged sections
- High reliability shelter can be quickly repaired in both deployed or collapsed positions

SCP-TZB04-Z

Lightweight and economical multi shelter set up by 2 people in 2 minutes to accommodate 4-6 personnel

## Rapid Set-Up

- Utilizes TVI's patented articulating frame technology
- No inflation devices, poles or electricity required
- Can be quickly relocated after set-up

## Standard Features

- Robust frame erects and operates even with damaged sections
- Each side contains a screen window with cover flap
- White canopy top provides ambient, natural light

## Shelter Specifications

- Canopy is UV stabilized, fire retardant and chemical resistant
- Shelter is constructed from non-corrosive materials
