

4-LINE DECONTAMINATION SHELTER

Product Overview

Large insulated four line decontamination shelter for effective decontamination of both ambulatory and non-ambulatory casualties within the same footprint.

Features

- Pre-fabricated Shelter design insures state of the art performances, reliability, and speed of deployment
- Shelter configuration allows for 4 lines of ambulatory patients, 2 lines of non-ambulatory or a combination of both
- Side doors reduce wind profile for cold weather operation and allow quick technician access to assist struggling patients
- Integral fabric booms, pre-plumbed with Quik Connects for hand sprayer operation and are included. Each nozzle produces .6 gpm
- Curtains set to segregate male and female patients and provide undress, wash, rinse and redress stations in the ambulatory lanes
- Corrosion resistant anodized aluminum frame with chemical resistant fabric provides for long life and reliability
- Canopy and liner includes white, opaque skylight that provides ambient lighting and protects exterior frame from contaminants and expedites post-use cleanup
- Camlok connectors allow easy plumbing connection with gloved hands

SD4-IZA10-GZ

Lightweight and economical decon shelter set up by 6 people in 5 minutes

Rapid Set-Up

- Utilizes TVI's patented articulating frame technology
- No inflation devices, poles or electricity required
- Can be quickly relocated after set-up
- Shower system easily connects to garden hose or fire hydrants

Standard Features

- Dual cladding for thermal efficiency
- Chemtex basin collects contaminated waste water
- Curtain set provides four lanes (male, female) of undress, wash, rinse and redress
- White canopy top provides ambient, natural light

Shelter Specifications

- Canopy is UV stabilized, fire retardant and chemical resistant
- Shelter is constructed from non-corrosive materials
