

COMMAND/LOGISTICS SHELTER

Product Overview

Command/logistics shelters employ patented articulating frame technology to provide rapid deployment and rugged, all-weather performance.

Features

- Pre-fabricated Shelter design insures state of the art performance, reliability, and speed of deployment
- Exterior canopy and interior liner provide insulation during both hot and cold weather deployments
- Side entrances provide access to shelter while limiting wind profile in cold weather
- Uses include command/control post, triage center, warming and rehabilitation area
- Side screen windows provide ventilation and ambient light
- Compact footprint and light weight insure easy two person deployment under any conditions
- Corrosion resistant anodized aluminum frame with chemical resistant fabric provides for long life and reliability
- Interior canopy includes white, opaque skylight that provides ambient lighting and protects exterior frame from contaminants and expedites post-use cleanup
- One piece design deploys with simple manual lifting, with no poles required
- Robust frame erects and operates even with damaged sections

SCL-HZB06

Lightweight and economical decon shelter set up by 2 people in 2 minutes to accommodate 4-10 personnel

Rapid Set-Up

- Utilizes TVI's patented articulating frame technology
- No inflation devices, poles or electricity required
- Can be quickly relocated after set-up

Standard Features

- Dual cladding for thermal efficiency
- Side door for cold weather operations
- Full length screen windows with cover flaps
- White canopy top provides ambient, natural light

Shelter Specifications

- Canopy is UV stabilized, fire retardant and chemical resistant
- Shelter is constructed from non-corrosive materials
