

# MASS CASUALTY DECONTAMINATION SHELTER

## Product Overview

High capacity 3 line shelter for ambulatory and non-ambulatory patients. Two undress/redress modules with one high capacity shower shelter allows for dramatic increase in the number of people processed per hour.

## Features

- Pre-fabricated Shelter design insures state of the art performance, reliability, and speed of deployment
- Integral fabric booms, pre-plumbed Quik connects and patented articulating frame reduces set-up time, maintains system integrity and increases functionality
- Curtain set with clips to connect to the ground is used to segregate male, female and non-ambulatory patients and provides undress, wash, rinse and redress stations in the ambulatory lanes
- Internal ergonomic hand sprayers enable decontamination of non-ambulatory casualties with user directed spray (ordered separately)
- Corrosion resistant anodized aluminum frame with chemical resistant Aeron fabric provides for long life and durability
- Interior canopy includes white, opaque skylight that provides ambient lighting and protects exterior frame from contaminants and expedites post-use cleanup
- Camlok connectors allow easy plumbing connection with gloved hands

SMP-UZA16-GZ

Lightweight and economical decon  
shelter set up by 6 people in 5 minutes

## Rapid Set-Up

- Utilizes TVI's patented articulating frame technology
- No inflation devices, poles or electricity required
- Can be quickly relocated after set-up
- Utilizes quick connect/disconnect fittings for rapid water connection

## Standard Features

- Internal fabric showers requires no installation
- Chemtex basin collects contaminated waste water
- Shelter features up to 7 consecutive shower stations for a total of 50 body sprays
- White canopy top provides ambient, natural light

## Shelter Specifications

- Canopy is UV stabilized, fire retardant and chemical resistant
- Shelter is constructed from non-corrosive materials
