PRODUCT SPECIFICS

ENVIRONMENTAL SEALING SERVICES

SEI's environmental protection packaging technology extends the useful life of commodity items such as parachutes, survival equipment, sleeping bags and life rafts. Safe from the deteriorating effects of humidity, salt spray and air quality, protected products will perform more consistently to design requirements while providing additional long-term value by reducing maintenance and possible replacement costs.

Sleeping Bags

Patented Parachute Sealing Process
Survival Equipment
Sleeping Bags
Life Rafts

Parachutes

Benefits:

- Reduced bulk
- Preservation
- Molded shapes for storage ease
- Improved pack density
- Environmental protection
- Life cycle cost enhancements through reduced inspection cycles
